KUDOS!

Kudos to our new program coordinator:
Alex Gough!

“Major kudos to Alex for setting up all these tele morning report and noon conferences and generally being super on top of it.” - Shuby Priyadarshini (PGY-2)

“Kudos to Alex for these lunch page limericks. They’re delightful!” - Jordan Standlee (PGY-3)

CONGRATULATIONS TO THE INCOMING CLASS OF 2024!

Sheng Tang
Penn (MD/PhD)

Jasmine May
Northwestern (MD/PhD)

Ryan Donaghy
Thomas Jefferson

Martin Bauknight
Columbia

James Kaprielian
Tulane

Brian Wall
University of Iowa

Dina Ghandour
University of Edinburgh

Brian Liu
Pitt (MD/PhD)
MORE KUDOS!

“Dan Jia (PGY-1) took exceptional care of my A Firm patients on his nightfloat block last week. Not only did he expertly navigate several challenging rapid responses on my sickest patients, but he also dedicated extra time to my comfort care patients. A Firm nights are some of the busiest of residency and despite this, he took the time to sit down and be present for the family of a dying patient. My patient's family expressed to me how much this meant to them and the palliative care attending complimented his work as well. I was very impressed. I wish we were keeping him in medicine!” - Sally Friedman (Medicine PGY-3)

Kudos to Shuby Priyadarshini (PGY-2) and Sarah Brooker (PGY-2) on their recent interACTN case, “The Case of a 38-year-old Previously Healthy Man Who Developed Diplopia and Difficulty Chewing after a Febrile Illness” - Dr. Bega

“Kudos to Nick Hac (PGY-4) for all of his hard work putting together the fundoscopy lectures, especially adapting them around our new Morning Report format. They have been really informative and useful.” - Elizabeth Sugg (PGY-2)

Kudos to Behnam Sabayan (PGY-4) for an excellent clinical case conference! - TNTC Residents & Fellows

“Kudos to Rafal Sobota (PGY-3), who had as many patients on his own list in a single day as general, stroke and consults had put together (+8 new patients)” - Jordan Standlee (PGY-3)

“Kudos to Rafal Sobota (PGY-3) for always being a team player and helping me with procedures on a very busy Sunday.” - Christina Lineback (PGY-3)

Kudos to Behnam Sabayan (PGY-4) and Christina Lineback (PGY-3) on publishing AAN NeuroBytes covering “what is cognitive aging” and “cervical and vertebral arterial dissections,” respectively.
