"I wanted to let you know about a resident in your department who went above and beyond. I paged late in the day (I believe after 4pm, I apologize) with a complex question for a patient who wanted to be discharged. Rafal Sobota (PGY-4) was enthusiastic without any hesitation from the beginning, and I felt comfortable consulting him. He and his team saw the patient right after we talked, put great thought into the case, reviewed the case with fellow and attending, and got back to me with a thorough plan. I really appreciate the length Rafal went to for this patient. He is bright and truly cares." - Dr. Niti Patel (hospitalist)

“Another shout out to Christina Lineback (PGY-4) for buying a patient a soup. Sometimes it’s the little things that can make a patient so happy!” - Glenn Harris (PGY-2)

“How amazing is SARA DOYLE (PGY-4)!!!! She has last minute volunteered to do extra teaching for our group of amazing students by doing their shelf review. I know they are all going to be in the 99%tile now!!! You are the best Sara!!!! - Dr. VanHaerents

“I’m amazed at the great work of Dr. Glenn Harris (PGY-2). He has demonstrated professionalism and grace in meetings with families who are experiencing intense emotions, demonstrates excellent communication skills, and remains in tune with the sensitive nature of the situations that his patients and their families are in. Dr. Harris alone is a tremendous healthcare provider, but what is more impressive to me, is his ability to work as a teammate. He engages with each member of the team and seeks their input appropriately. Dr. Harris is organized, hard-working, flexible, and able to articulate himself very well. I felt it was only appropriate that such an incredible Resident be recognized.” - Pamela Costis, LSCW

“10w had 100% LTR scores for the month of September! Meaning that every patient that completed a survey said they would definitely recommend NMH based off of their experience on 10w. This is a huge accomplishment and the highest of compliments since it comes from the patients themselves. Congratulations to your team!!” - Michelle Schaeve (10W Patient Care Manager)
“Huge thank you to Dr. Jordan Standlee (PGY-4), as I have received two separate students telling me outside of their evaluation how inclusive and supportive he is to their learning. Thank you Jordan!!!” - Dr. VanHaerents

“Kudos to our attending nurse Alyssa Molina who jumped through so many hoops (read: calling pharmacies for literal hours, arranging and then rearranging appointments in a logical order, to name a few), all to help ensure a smooth discharge for multiple socially complex patients. She is meticulous and efficient, and multiple patients have expressed their appreciation for her. Thanks for everything you do!” - Toni Cao (PGY-2)

“Kudos to Paula Lee (epilepsy fellow) for stepping up and covering the EMU when there was a last-minute coverage issue!” - Dr. Gerard

“Big Kudos to Rebecca DiBiase (PGY-2) and Jo Tang (PGY-4) for coming out and golfing at the Huntington’s Disease Society of America Golf for HD Event. It was their first time playing, and they did amazing!” - Brian Stamm (PGY-3) & Deb Huang (PGY-3)
